

WHITE PAPER

SpritzMoon

Crypto Token

IDEA

The **SpritzMoon Crypto Token (SPRITZMOON)**, totally *made in Italy*, is a Crypto **DeFi** developed on Binance Block Chain (**BSC**).

SpritzMoon has 3 objectives to develop, to be unique and distinguished by quality within the Crypto Token World:

1. Create a **Community** within which to develop creating economic value
2. **Sociality** is one of the strengths of this Crypto, infact it is foreseen by Statute that a large part of the gains realized over time will be earmarked for concrete aid to the various associations related to the Spritz theme
3. Allow all members of the community to use the token as a Payment Tool for Weekend Spritz with Friends in **Community SpritzMoon Bar**

SpritzMoon Crypto Token (SPRITZMOON) is an easy-to-access, easy-to-reach Token Crypto

The **Brand SpritzMoon** (the Spritz on the Moon) takes inspiration from what happens every day in the Crypto world with realities often related to characters from Comics, History or even animals (Doge and Shiba Inu to give a few examples).

SpritzMoon is inspired by the most famous Italian aperitif in the World, the Spritz and on this bond builds its distinctive characters.

The reasons for choosing SpritzMoon are:

Economic

1) On each individual Token 2 % is credited for each new purchased Token.

Practical example: Luca improves with 100€ 1,000,000 of SpritzMoon; his friend Alessio enters into the Community also with his 100 € and there has also he 1.000.000 of SpritzMoon; the Luca's token, as all that already in Community, they will rise in 2 % in proportion of Alessio's purchase; after Alessio Francesco always enters with 100 € and it will have his 1,000,000 of SpritzMoon; the Token of Luca, Alessio and of all the belonging ones to the Community will rise in 2 % in proportion to the purchase of Francesco. This system lets to the single wallet grow automatically for each new entry in the Community.

2) On each Community entry a part of the liquidity, always 2%, will increase the Liquidity Provider (LP) to allow at any time the exit from the Community itself.

3) Is provided a "Burn of Token (Burnt) of 2 %" in the way of increasing the value of the Token on the time (in all that he will be less and less Token in circulation and this will lead to an increase of the price, concept of shortage).

4) The system is structured to discourage the sales: a fee of 4 % will be applied on each single sale and it will be distributed automatically for 2 % garlic holder in the moment (like example preceding number 1), the rest 2 % is converted into BNB and the liquidity LP will go partially to increase on Pancake Swap (as to point 2). In practice the system will award a prize to the token Holders (those who will maintain the token for a long period).

5) The maximum, advided, purchase of 1,000,000 tokens in SpritzMoon for each Holder will allow the price a continuous and constant growth avoiding price crashes, as often happens to Crypto over exposed in the volumes.

Social

Sociality is one of the strengths of this Crypto, in fact it is foreseen by Statute that a large part of the gains realized over time will be earmarked for concrete aid to the various associations related to the Spritz theme, to prevent any kind of excess (The Whitepaper explains in detail how resources will be allocated to entities and associations sensitive to the # beverage # seguidinonbere # divertiticonlatesta theme).

Token Utility

Allow all members of the community to use the token as a "**Token Utility**" for Weekend Spritz with Friends (the token has and will have a real economic value like any other currency) and spread on the territory will happen thanks to numerous facilities that will accept SpritzMoon Crypto Token (recognizable by the Logo sticker) for Spritz time.

Core Values

Community

Founded by the community and for the community, we take pride in our collective mission. We support each other and other communities, and we have fun doing it

Sociality

We can make a real impact for the greater good, not just ourselves. By donating to association-charity, our goal will tie the double concept fun with Spritz yes, but in moderation preventing any kind of excess

Token Utility

Allow all members of the community to use the token as a "**Token**" for Weekend Spritz with Friends and spread on the territory will take place thanks to numerous facilities that will accept SpritzMoon Crypto Token.

The SpritzMoon Ecosystem

SpritzMoon Crypto Token (SPRITZMOON)

SpritzMoon Crypto Token (spritzmoon) is a BEP20 token issued on the Binance Smart Chain with a total fixed supply 1.000.000.000.000 of tokens. The ideation of SpritzMoon as a token with 3 simple functions: Reflection + LP acquisition + Burn token. The transaction is taxed a 4% fee, which is split 2 ways:

2% fee redistributed to all existing holders

2% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the SpritzMoon tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

Pancake Swap

Pancake Swap is a Binance Smart Chain- based Decentralized Exchange (DEX) for swapping BEP-20 tokens. To facilitate Spritz Moon's initial public offering, Pancake Swap offers our community the ability to exchange their BNB for SpritzMoon. In line with a pragmatic approach, SPRITZMOON be listed into major exchanges in the near future.

Binance Smart Chain

The Binance Smart Chain (BSC) is a blockchain network that runs in parallel to the Binance Chain. Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The Binance Smart Chain offers our community the added interoperability of facilitating their transactions through BNB-based wallets, such as Trust Wallet. An added advantage of issuing SpritzMoon tokens on the BSC is that it offers our community an affordable block chain experience through smaller transaction fees compared to the Ethereum Network.
